Mr. John McMahon  
Deputy Director  
Central Intelligence Agency  
7D 55  
Langley Headquarters  
Washington, D.C. 20505

Dear Mr. McMahon:

Enclosed is your complimentary copy of "Technology in War and Peace," a special Spectrum issue that probes the changing faces of war making and peacekeeping in this age of electronics, computers, and other advanced technologies.

We hope that you will find this a valuable compendium, and if so, will drop us a note to that effect. In exchange we would be happy to provide you with extra copies for your key staff members -- just specify how many you will need.

Cordially,

# IEEE spectrum
